

AMRITA KUMARI

Frontend Web Developer

✉ dev.amritasrc@gmail.com  LinkedIn  GitHub  Website  Ranchi, India

PROFESSIONAL SUMMARY

Frontend-focused web developer with experience building dynamic applications using JavaScript, React, HTML, and CSS. Skilled in API integration, DOM manipulation, and developing practical solutions such as browser extensions. Passionate about modern web development and creating clean, user-friendly interfaces.

EDUCATION

Jharkhand Rai University | Ranchi

Sep 2024 - Sep 2028

B.Tech in Computer Science and Engineering

CGPA : 9.09

PROJECTS

CopyIt |  Github  Website

Jul 2026 - Jul 2026

Individual project

- Developed a Code Snippet Vault using React.js, Tailwind CSS, and Monaco Editor, enabling users to create, edit, organize, and manage reusable code snippets with an IDE-like coding experience.
- Integrated Monaco Editor with CRUD operations, syntax highlighting, language selection, keyword search, and responsive UI to improve code organization and user productivity.

Technologies / Tools Used : React, Tailwind CSS, JavaScript

Rhythmify |  Github  Website

Jun 2026 - Jun 2026

Individual project

- Developed Rhythmify, a React-based music player integrating the YouTube Data API to search and stream songs through a custom playback interface.
- Built custom media controls with play/pause, seek, keyboard shortcuts, and real-time progress tracking in a responsive UI across 3+ screen sizes.

Technologies / Tools Used : React, Tailwind CSS, JavaScript

GitProfile |  Github  Website

Jun 2026 - May 2026

Individual project

- Built a GitHub Profile Search application using React.js, Tailwind CSS, and the GitHub REST API, enabling users to search and view real-time GitHub profile and repository information.
- Optimized API requests, component-based architecture, and responsive design to improve application performance, usability, and cross-device compatibility.

Technologies / Tools Used : React, Tailwind CSS, JavaScript, Github API

YouTube Study Mode (Chrome Extension) |  Github

May 2026 - May 2026

Individual project

- Built a Chrome extension that blocks 4+ major distracting elements on YouTube using DOM manipulation and CSS.
- Used content scripts and CSS to dynamically modify the DOM and maintain focus mode across navigation.

Technologies / Tools Used : JavaScript, HTML, CSS, Chrome Extensions API

SKILLS

Databases : Supabase

Frameworks & Libraries : React, Tailwind CSS, Framer Motion

Languages : English, Hindi

Programming Languages : C, C++, Java, Python, JavaScript

Soft Skills : Communication, Leadership, Critical Thinking, Decision Making, Problem Solving

Tools & Platforms : Git, GitHub
